

Quick Tips - is Your Square Really Square?

1. Draw Line
Place your square against the straight edge of a board and draw a line.

2. Flip Square
Flip your square over and see if it lines up with the pencil line you just drew.

3. Open Up
If your square is *less than* a 90-degree angle, tap the inside corner to open up the legs.

4. Close Up
If your square is *greater than* a 90-degree angle, tap the outside corner to close up the legs.
